

Description du phénotype drépanocytaire aux différentes échelles envisageables

| Échelles du phénotype | Caractères | Individu sain | Individu drépanocytaire |
|-----------------------|------------|---------------|-------------------------|
| Macroscopique         |            |               |                         |
|                       |            |               |                         |
|                       |            |               |                         |
|                       |            |               |                         |
| Cellulaire            |            |               |                         |
|                       |            |               |                         |
|                       |            |               |                         |
| Moléculaire           |            |               |                         |
|                       |            |               |                         |
|                       |            |               |                         |

### Liens entre les différentes échelles du phénotype

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on its right side, suggesting it's resting on a surface.

## Liens entre le phénotype, le génotype et l'environnement

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
